

Last year we expanded our facility, plasma, flame-cutting and saw-cutting capabilities tremendously. Our 21,000 sq ft addition is complete and already filled with inventory. We added a 5 axis Messer plasma w/ inkjet that has a 120" x 516" downdraft slagger table. The new table is also equipped with (4) high speed alpha torches for more precise flame cuts. Minerd also purchased (2) new Behringer Saws and now has the capacity to cut 31.5 diameter round bars and 33.5" wide structurals.
