

Minerd & Sons, Inc.

A STEEL SERVICE CENTER

5-AXIS PLASMA CUTTING SYSTEM

Our “state of the art” 5-axis Hypertherm plasma with inkjet is equipped with a 120” x 640” downdraft Slagger table. Our 5-axis beveling capabilities and close tolerances will help to cut costs on your secondary processing. The 16 pin REA can mark each part with your DWG#, JOB# and/or PO#. As always, let us know if you require any special packaging or handling and we will accommodate your needs.

Key Capabilities

- 5-Axis beveling
- Cutting envelope of 120” wide by 640” long
- 16 pin REA inkjet part marker
- 400 AMP high definition plasma cutting
- Multiple CNC controlled plasma cutting systems

PROCESSING

Angle Rolling
Annealing
Bull Dozing
Coating
Cold Sawing
Flame Cutting
Flattening
Forming
Grinding
Heat Treating
Honing
Laser Cutting
Mechanical Testing
Milling
Plasma Cutting
Plating
Precision Grinding
Press Braking
Punching
Rolling Cones
Rolling Cylinders
Saw to Length
Water Jetting
Welding
